

La superficie liscia e leggermente ondulata della struttura a mandorla dona un'estetica di classe anche alla gamma di cestini per rifiuti. Materiali di alta qualità e dettagli sofisticati fanno sì che il cestino Minium possa essere utilizzato in spazi pubblici all'aperto ma anche in interni. Il cestino è disponibile in diverse versioni: con gamba singola da fissare sotto la pavimentazione, con coppia di gambe ad U da montare a terra, versione prolungata con piedistallo ridotto al minimo e molte altre, oppure con corpo sospeso su una sola colonna. Opzionalmente, copertura per tutte le versioni.

L'involucro è realizzato con profili in alluminio anodizzato o doghe di legno, il telaio superiore e il coperchio sono in fusione di alluminio. Il telaio di supporto è zincato con verniciatura a polvere. Il contenitore interno è realizzato in plastica resistente o con telaio ferma-sacco per sacchetto di plastica.
