

NANUK

Design: David Karásek, Radek Hegmon

Estremamente parsimonioso in termini di forma, strutturalmente semplice, materialmente vario – un esempio di design intelligente che offre una delle gamme di cestini più ampie con un aspetto fresco ed attraente. Cilindrico o a quadrato, due forme geometriche di base situate su una gamba centrale con diversi tipi di rivestimento per un uso veramente universale. Un cilindro rivestito in legno dall'aspetto piacevole, il blocco comprende anche versioni in lamiera d'acciaio rinforzata, lamiera stirata trasparente, laminato ad alta pressione (HPL). Le versioni cubo possono anche essere equipaggiate con un coperchio elegante.

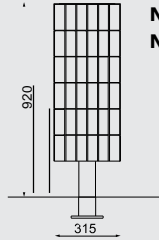

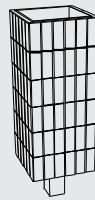

Struttura d'acciaio zincato con verniciatura a polvere, il rivestimento può essere realizzato in doghe di legno scanalato, lamiera in acciaio inox, o lamiera stirata di acciaio zincato. Spegni-sigaretta in acciaio inox nel coperchio, rivestimento in zinco. Porta chiudibile a chiave da aprire lateralmente. Ancoraggio sotto o sopra la pavimentazione.
