

VERA SOLO

Design: David Karásek, Radek Hegmon

Il kit modulare multiuso basato sul design della gamma Vera è composto da moduli diritti e curvi e consente la creazione di unità lunghe e attraenti in linee o cerchi. Le gambe si trovano nell'asse della panchina, il che semplifica la silhouette, facilita l'accesso da entrambi i lati e aiuta con la pulizia dello spazio sotto la panchina. I sedili possono anche essere montati a parete, il che amplia le possibilità della gamma. La gamma comprende anche elementi accessori come schienali e braccioli, che sottolineano la forza del design Vera Solo. Piccole proporzioni, design rilassato e senza tempo e scalabilità predestinano la serie di design Vera Solo per l'uso nella più ampia gamma di progetti.

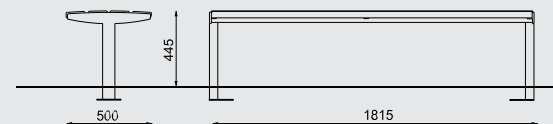

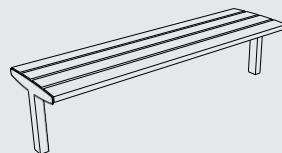

Struttura d'acciaio zincato rivestito con verniciatura a polvere. Seduta e schienale in doghe di legno massiccio o tondini in acciaio / acciaio inox, senza giunti visibili alla struttura in acciaio. Nuovamente anche con braccioli.
